

## Miller & Rhoads

Out-of-Town Orders Promptly Filled.

### Men's Fleece-Lined Underwear

There isn't another store anywhere that sells this Underwear for 29c. Prices run up as high as 50c everywhere but Miller & Rhoads. Brown mixed cotton, lined with a clean white fleece. All sizes in Shirts & Drawers up to 44. Our supply is limited at this price—Better take advantage of the opportunity to-day.

29c

### Men's 25c Hose for 17c.

Cashmere Hose, in dark Oxford & black, with an Oxford thread heel & toe.

You'll find this Hosiery to wear much better than the rough wool hose at 25c.

Special here at 17c.

## CALL FOR FLUME BIDS WITHIN NEXT TEN DAYS

No Specifications as to Material, Though General Opinion Leads Toward Concrete.

### BURGWYN EXPLAINS OFFER

Agrees to Complete Work in Nine Months and Divide Profits With City.

After hearing four tentative propositions to construct or reconstruct the flume from the settling basin to the Pump-House, the Council Committee on Water last night decided to advertise for bids, each bidder to furnish his own plans and specifications. The bids will be opened within ten days, and at that time each bidder will have the opportunity of explaining the advantages of his plan without having other engineers present. The discussion last night, which lasted several hours, and was opened by Colonel C. P. E. Burgwyn, who explained in detail his plan for conveying the water, seemed to indicate that in the minds of the engineers present some form of concrete construction will be necessary, although opinions differed between a continuous or monolithic construction, and a lock joint or sectional pipe. All of the engineers who spoke agreed that a metal pipe line would be temporary expedient of comparatively small capacity and limited durability. Members of the Water Committee also expressed the view that, under all the circumstances, so far as shown by the offers in hand, a concrete flume would be much more durable. Asked as to the probable life of concrete, Colonel Burgwyn said he had seen one in Rome which had been in use certainly 2,000 years, and which he had been unable to chip with his penknife.

The meeting was held in the Council chamber, a large number of engineers, builders, and interested in the matter being present. Mayor Richardson and City Attorney Pollard sat with the committee.

### Colonel Burgwyn's Offer.

Colonel Burgwyn's letter and proposition was read, and he was invited to explain his driving and plan. "I propose," he said, "to strip the present flume, take off the riprap and dirt and the top of the egg, down to the sub-base, and on this base I will construct a circular flume, seven feet in diameter on the inside, of twelve-inch walls, reinforced with one-half-inch rods. I propose a saddle and sixteen feet to steady the flume and anchor it to the sub-base. I have submitted my plans and calculations to consulting engineers and have their report. One of their points of criticism was that the walls were thicker than necessary. I made it twelve inches, and the engineers I consulted said the seven-inch walls adopted by Mr. Bolling would be ample. I left it at twelve, however, to be on the safe side. I have also added, at the suggestion of consulting engineers, relief stacks at intervals to take off the water pressure, venting the flume and relieve the danger of a sudden shutdown of the pumps.

"The second criticism of my plans was on the size of the flume, the engineers saying seven feet was excessive. I figure the cost of the larger size only in the extra concrete and metal reinforcement. I believe the extra two feet in diameter can be built at not much greater cost. The carrying capacity of a circular flume is in the proportion of the square of its diameter, so that, compared with a five-foot flume, it would be twenty-five to forty times, making my flume almost double. Besides providing for future needs, the actual daily capacity will vary with the height of water in the basin. The only other point of criticism was in the cost of the saddles. We have to go out in the river, at any rate, and with the danger of the flume being lifted from its base in freshets, especially if empty at any time, I did not think we could safely dispense with the saddles.

Stakes Reputation on Result.

"My plan is one now commonly adopted in cases of engineering difficulties or uncertainties. If the cost can be brought down, the city gets one-half the benefit. The element of uncertainty is in the actual condition of the sub-base. We cannot tell definitely until the flume is dismantled. Any out-and-out bid from a contractor would have to include a high margin of risk, which in this case the city carries. As to the time, I think a large force of men could be used, strung out along the works. It is actually important to bring the water down at once, I could put in a temporary pipe line of spiral riveted pipe, and the pipe taken up and gold after the concrete flume is in place. I see no reason why the concrete flume could not be in use in nine months. I am to employ assistant engineers and laborers; buy all material; pay for the labor and material on my approval, but no compensation to be paid me or my assistant engineers until the flume is

complete. Then I am to get one-half of all saved under \$75,000."

"Then if the flume is a failure the city loses the cost of the material and labor."

"Yes, and I lose my compensation, my reputation, and the pay of my staff of assistant engineers. If I make a success the city makes a success. I stake more on the proposition than the city does."

"What is your objection to a cast-iron pipe line?"

"The city has a grand piece of work in the settling basin. It is useless without the flume. You could not get a seven-foot flume in caisson except at enormous cost, and I regard a small flume to be so big an undertaking as an engineering mistake. A forty-eight-inch pipe line would have a capacity compared with my flume of sixteen to twenty-five feet, and the iron might at any time burst under sudden contraction. It would be at small saving if any, and be, besides, an engineering blunder."

"Are you prepared to bid on the work with guarantees as to time and price?"

"That changes my position from the city's executive officer to a contractor. I would have to add an enormous profit for my risk."

Other Offers Submitted.

Mr. Willis Lambert, a contractor, offered to submit a bid for either reinforced concrete or caisson, the city to furnish him the grades. He said he was a practical man, not an engineer, and thought a concrete flume could be built for \$55,000, using either the Meriwether system or lock joint pipe, or by making his pipe in sections, and putting it in position. He proposed a five-foot flume, with walls six inches thick. He thought no anchoring was necessary.

A letter was read making a proposition on behalf of E. D. T. Myers and Stamps Brothers & Ragland to build a four-foot flume in five months for \$45,780, plans and specifications to be submitted later, the designs to be prepared by the city. The committee said that he did not care to give away the details of his plan, but would inform members of the committee later as to the character of construction proposed. He declined to state whether it would be metal or concrete, but said it would be calculated for supplying 10,000 inhabitants at normal consumption, and be practically imperishable.

### SCHLEIF DISMISSED

Inefficient Evidence Brought Against Him on Charge of Criminal Negligence.

Policeman Walter Schleif, who was yesterday evening brought before the Board of Police Commissioners on a charge of criminal negligence, was dismissed, on evidence not being sufficient to sustain the charge brought against him.

The board did, however, caution the officer to be more careful of his words hereafter, and the admonition is meant for every member of the force. The commission stated that hereafter any man on the force who criticizes the actions of any superior will be punished to the full extent lying within their powers.

## A CARD

In view of certain rumors to the effect that we, either individually, or jointly, are interested in or about to become interested in certain mineral water property other than the Buffalo Lithia Springs Water property, and in view of the fact that the numerous inquiries we are receiving would indicate that these rumors have been accredited by the public, we think it well to state as follows: We, the undersigned, have absolutely no connection either individually or jointly, directly or indirectly, with any mineral water property or any resort property, either in the State of Virginia or elsewhere except the Buffalo Lithia Springs property. We have at this time no intention of forming any such connection, nor have we at any time had any such intention. Any report to this effect is without foundation in fact and is not authorized by us in any way. No member of the Buffalo Lithia Springs Water Company has any connection with any other mineral water property, either directly or indirectly, other than the Buffalo Lithia Springs Water property, and the use of the name of any member of the company in connection with any other property of this nature is entirely without foundation.

## ALBERT ALPERRIN SERIOUSLY HURT

Knocked Down and Trampled Under Foot by Runaway at Second and Marshall.

### DRIVER IS STILL UNKNOWN

Wife and Relatives Gather About Bedside in Hospital, but Receive No Assurances.

Knocked down by a horse said to have been running away, Albert Alperrin, a prominent Russian Jew, living at No. 191 East Leigh Street, fell beneath the wheels of the vehicle about 7 o'clock last night at Second and Marshall Streets, and was so seriously injured that his death is hourly expected. Alperrin was on his way home to supper from his place of business on Fourth Street when the accident occurred. He was crossing Marshall Street at Second when a horse and vehicle driven by an unknown negro came tearing along and knocked him down. The wheels passed over his head, fracturing his skull on the left side. He lay on the ground a few minutes before help came.

Identified at City Home.

When he was discovered a police officer was notified, and a call was sent in to the city ambulance. The telephone was out of order and no response came. Then the consciousness of the man was regained, and he was carried to the City Home. At the time none knew the identity of the man. Somebody, however, identified him at the City Hospital, and his relatives were immediately notified. Finding that he was so severely injured, they called up Dr. George Ben Johnston and had him removed to the Memorial Hospital, where he was operated on by Dr. Johnston and his assistant, Dr. Willis.

It was found that a piece of the skull was resting against his brain, and this weight was held by the automobile patrol, which came soon after and carried him to the City Home. At the time none knew the identity of the man. Somebody, however, identified him at the City Hospital, and his relatives were immediately notified. Finding that he was so severely injured, they called up Dr. George Ben Johnston and had him removed to the Memorial Hospital, where he was operated on by Dr. Johnston and his assistant, Dr. Willis.

Cannot Get the Details.

The police are not sure whether Mr. Alperrin was injured in a runaway or whether the accident was due to the carelessness of the negro driver. A search for him will be instituted at once, and if found he will be held answerable for the accident.

Mrs. Alperrin, her daughter, Mr. Alperrin's sister-in-law and his brother-in-law and others gathered about the bedside, but will be given no consolation. For the victim was still unconscious when they left the hospital at a late hour last night.

Mr. Alperrin is fifty-two years old. He is prominent and was lately elected president of the Russian congregation, which holds its services in the Synagogue on Eleventh Street. He formerly lived at 234 East Eighty-sixth Street, New York, and came here about six years ago to engage in the decoration business.

### Glrag's Case Continued.

The case against George Glrag, a barber, charged with helping to run a gambling house at No. 7 North Seventeenth Street, was continued yesterday morning to January 30th for the summation of other witnesses. Glrag was arrested by Policemen at New York City, and is expected to catch all who were connected with the "Columbia Literary Club," which he is alleged to have run as a gambling house.

### Pupils Observe Birthday.

Lee's and Poe's birthdays were celebrated at Nicholson School yesterday morning. Southern songs were sung and quotations from or about Lee and Poe were given by each grade. Myrtle Thompson, of seventh grade, read a short sketch of Poe, and Bernice Buchanan, of seventh A, read General Lee's farewell address. The feature of the occasion was an inspiring address on Lee and Poe by Prof. J. C. Metcalf, of Richmond College.

### Qualifications in Chancery.

James B. Doherty qualified in the Chancery Court yesterday as administrator of the estate of James L. Doherty. The estate is small.

Osborne E. Meyer qualified in the same court as administrator of the estate of William Meyer. The estate is also small.

### Dr. Caltech in Philadelphia.

Dr. E. N. Caltech left yesterday for Philadelphia, where he will attend the convention of the Union of American Hebrew Congregations and a representative of congregation Beth Ahavah. He will return Friday morning.

### Dies in Hospital.

Mrs. F. D. Finnegan, of Bramwell, W. Va., died in a hospital here last night after an operation. Her husband was at her bedside when she died, and the remains will be taken to West Virginia to-day.

### Holds Meeting To-Day.

An important meeting of the Hollywood Memorial Association will be held at noon in the Second Presbyterian Church. Mrs. W. H. Timberlake, the secretary, urges that all members be present.

ST. JOHN C. GOODE,

## TO SEARCH MISER'S HOUSE FOR MONEY

Mrs. Ann F. McDonough, Found Dead Last Night, Believed to Have Left Large Sum.

### DISCOVERED BY SERVITOR

Old Lady, Who Lived Alone With Pets, Said to Have Gold She Brought from Ireland.

After she had been dead several hours, Mrs. Ann F. McDonough, of No. 6 North Eighteenth Street, was found early last night by her constant servitor, James Langley, colored, who returned to see if there were anything more he could do for her before she retired. He had been to the house at 5 o'clock to perform some service, and returned again later.

As he entered the house his attention was attracted by the barking of her pet dog. He opened the door of the bedroom, and there he found Mrs. McDonough stretched across her bed. She was dead. The dog, a little white terrier, and a cat, Mrs. McDonough's only pets, were in the room alone. The dog, evidently aware of the fact that something had happened, exhibited signs of the deepest distress. He leaped on the bed. Finally he became so obstreperous that he had to be driven howling from the room.

### Had \$10,000 in a Bank.

Peculiar interest is lent to the death of the old lady—for she was four-score years of age—by the fact that neighbors believe she had a large sum of money secreted in her house. Years ago she fell heir to about \$10,000, and on the interest of this sum, safely banked for her, she is said to have lived. She had a lawyer who called on her regularly, and she was known to have a will. But much of this she is believed to have saved, for she spent little and lived meagerly. It is also related of her that she had saved up a little gold that she brought with her from Ireland, and she was known to have years ago, when she came to this country. She was of a saving disposition—even miserly—and her wants were few. Langley called occasionally to split wood for her and to do other odd jobs, but he never saw her money. He talked with the outside world, and her days were passed in almost solitary confinement except for the presence of the two pets. She had offers of homes from other relatives, but she invariably refused these offers of kindness, preferring to live alone in the desolate house in which she died.

Relatives will institute a search of the premises, it is said, to-day, and it is expected that much money will be found. The \$10,000 is safely stored away in a bank.

### SUES CITY AND COMPANY

Clay Sues Negligence of Corporation Causes Flooding of His Property.

Suit was instituted yesterday in the City Circuit Court by J. E. Clay, a contractor, who holds title to the property of the Passenger and Power Company, for damages laid at \$3,000. While no suit is understood to be the overflooding of property belonging to the plaintiff on Fairmount Avenue, which has so long been the subject of litigation, the suit is said to have been forced to abandon his home and the house is now vacant. His ground against the city is that the sewer at this point is badly choked, and he is allowed to become choked. The street car company, he alleges, has been gradually from time to time ballasting its tracks with gravel, and he has been forced to abandon his home and the house is now vacant. His ground against the city is that the sewer at this point is badly choked, and he is allowed to become choked. The street car company, he alleges, has been gradually from time to time ballasting its tracks with gravel, and he has been forced to abandon his home and the house is now vacant. His ground against the city is that the sewer at this point is badly choked, and he is allowed to become choked.
